

"Made in Sweden"

Burner effect 15 – 35 kW.

Safety

The burner has a unique control system that oversees the functions, such as automatic ignition. Manual ash removal, overheating protection. The burner is very durable.

Comfort

The ash removal from the burning pipe is made, without disassembly of the burner, with the built-in ash removal scrape. This technique provides for effective burn-up, and low usage of pellet.

Accessories

- Alarm functions
- The control system is upgradeable and can easily be replaced.
- Automatic ash removal
- Ash tray
- Storage 200 liters or after demand.

Technical specifications

Model P20, Effect	20 kW
Model P35, Effect	35 kW
Length in boiler	195 mm
Total length	515 mm
Mantle pipe in boiler	Ø 156 mm
Height with feed pipe	520 mm
Height without feed pipe	290 mm
Width	240 mm
Automatic ignition	Yes
Main power	110 /220V AC
Feeder screw	24V DC
Weight without screw	17 kg
Burner pipe in heat durable stainless steel
